

# TP85i

## DESIGN IN EVERY DETAIL

Designed down to the smallest detail, the **TP85i** printer is the latest addition to the OXHOO range. This modern 'cloud' printer incorporates a WEB server with which any application can communicate over the network to print, control a client display or connect and retrieve information from a BC361 handheld scanner.

Communication between the application and the printer is via Postman requests.

The TP85i can also be equipped with an optional Wifi/Bluetooth dongle, available in black only.

Tested and approved, it's unanimously acclaimed... give it a try.
